FOREWORD

This amendment has been prepared by IEC technical committee 61: Safety of household and similar electrical appliances.

The text of this amendment is based on the following documents:

FDIS	Report on voting
61/1565/FDIS	61/1608/RVD

Full information on the voting for the approval of this amendment can be found in the report on voting indicated in the above table.

_____

7   Marking and instructions

7.10   *Replace the text of the addition by:*

If the **off position** is only indicated by letters, the word "off" shall be used.

10   Power input and current

Add:

10.2   *Addition:*

NOTE – The selected representative period is the period during which the current is the highest.

15   Moisture resistance

15.2   *Add the following as the penultimate paragraph of the replacement:*

For appliances having a working surface, 0,5 l of water containing approximately 1 % NaCl and 0,6 % of acid rinsing agent, as specified in annex AA of IEC 60335-2-5, is poured over the top of the appliance, the controls being placed in the on position. The control knobs are then operated through their working range, this operation being repeated after a period of 5 min.

19   Abnormal operation

19.13   *Add:*

During the tests of 19.101, the temperature of windings shall not exceed the values shown in table 6.

19.101   *Delete the second paragraph.*

24   Components

Replace the text by:

This clause of part 1 is applicable, except as follows:

24.1.2   *Addition:*

The number of cycles of operation for programmers is 3 000.
